

# DOES YOUR BUSINESS COMPLY WITH PRESSURE SYSTEMS SAFETY REGULATIONS?

**Do you know if the PSSR regulations apply to your workshop?**

The Pressure Systems Safety Regulations 2000 (PSSR) cover the safe design and use of pressure systems. The aim of PSSR is to prevent serious injury from the hazard of stored energy (pressure) as a result of the failure of a pressure system or one of its component parts.

PSSR applies to various systems including compressed air, gases which exert a pressure in excess of 0.5 bar above atmospheric, and also where there is a pressure vessel that contains steam or has a pressure x volume product of 250 bar litres or more.

## ACTION REQUIRED

Most garage workshop compressed air systems will come under the scope of PSSR due to the storage of compressed air in a receiver or ringmain and as such should have a Written Scheme of Examination (WSE) produced, and examinations carried out.

**Did you know we can provide this solution?**

We can, because we are registered with PressureSafe™, a scheme that provides IOSH accredited training and auditing of our engineers. We can assess your system and if PSSR applies to you, draw up a scheme and carry out examinations. We will also provide you with your own personal login to your online report area.

Our PressureSafe™ Schemes can be provided for a simple system for as little as £292.00 + VAT per annum.

**To enquire please call  
01670 516816 or email  
[enquiries@gottservices.com](mailto:enquiries@gottservices.com)**

## **SAMPLE PRICELIST 2019/20**

### **1. A Simple System**

To carry out an examination of an air compressor, receiver and all onboard valves and safety controls/switches, produce a report and written scheme, and create access to your personal online records in the PressureSafe cloud reporting system. A flexi airline hose, or short run fixed airline system may be included in this price.

**£292.00 +VAT**

### **2. A System With Fixed Pipework Installation Up To 100M Long**

To carry out an examination of an air compressor, receiver, all onboard valves and safety controls/switches, and pipework installation. Produce a report, written scheme, drawing of system, and create access to your personal online records in the PressureSafe cloud reporting system.

**£442.00 +VAT**

### **Additional Items:**

Each Additional Air Compressor (includes all onboard valves and safety controls)

**£50.00**

Each Additional Vessel (receiver, dryer or separator)

**£70.00**

Fixed pipework installation larger than 100m

**Extra £1.50 +VAT per metre**
